

## one moment in love

"Fresh, young and emerging" is how fledgling Australian artist Jaemin Melt describes the newly established Art Moment Gallery in Bondi which will show some of her work this month. The same can be said about Jaemin herself. As a single mother - having married at 17 and then divorced at 20 - and raising 3 children has armed her with a wealth of life experience. So it's no surprise the first her upcoming exhibition leading up to Valentine's Day addresses the theme of love, in all its wonderful and torturous states. Says Jaemin on the inspiration behind her exhibition: "The concept of love which I paint about is not just the romantic kind but also the aftermath of lost love, the pain of a broken heart. I have been full circle myself and want to express all that I have felt."
